OLA Ride Booking Analytics
Business Requirements & Reporting Specification

Executive Summary

OLA requires an analytical reporting solution to monitor ride booking operations, customer experience, revenue performance, service quality, and operational efficiency. The objective is to transform operational ride data into actionable business insights through SQL analysis and Power BI dashboards.

Business Objectives

Monitor bookings, cancellations, revenue, customer behavior, driver performance, service quality, and operational efficiency.

Dataset Fields

Date, Time, Booking_ID, Booking_Status, Customer_ID, Vehicle_Type, Pickup_Location, Drop_Location, V_TAT, C_TAT, Canceled_Rides_by_Customer, Canceled_Rides_by_Driver, Incomplete_Rides, Incomplete_Rides_Reason, Booking_Value, Payment_Method, Ride_Distance, Driver_Ratings, Customer_Rating.

Key Reporting Requirements

Booking Performance Analysis; Vehicle Performance Analysis; Revenue Analysis; Customer Analysis; Cancellation Analysis; Operational Efficiency Analysis; Service Quality Analysis.

Core Business Questions

1. Identify successful bookings. 2. Average ride distance by vehicle type. 3. Total rides cancelled by customers. 4. Top customers by ride count. 5. Driver cancellations due to personal/car-related issues. 6. Maximum and minimum driver ratings for Prime Sedan. 7. Rides paid using UPI. 8. Average customer rating per vehicle type. 9. Total booking value from successful rides. 10. Incomplete rides and associated reasons.

Dashboard Requirements

Executive Overview, Booking & Operations Analysis, Vehicle Performance Analysis, Revenue Insights, Cancellation Analysis, and Service Quality dashboards.

Required KPIs

Total Bookings, Successful Bookings, Cancellation Rate, Total Revenue, Average Booking Value, Average Ride Distance, Customer Ratings, Driver Ratings, V_TAT, and C_TAT.

Expected Deliverables

SQL reporting layer, validated datasets, interactive Power BI dashboards, documentation, KPI tracking, and stakeholder-ready business insights.
